

Cupertino ARES/RACES 2022 Year-End Review

December 1, 2022
Jim Oberhofer KN6PE

Topics for tonight

The top 7 changes/updates for CARES and Citizens Corps operations...

7. Volunteer Annex and Capabilities
6. Covid: what's next?
5. Outdoor Packet
4. 2022 Fire Season
3. PG&E's PSPS vs EPSS
2. Evacuation Maps
1. Earthquakes... they're back!

#7

VOLUNTEER ANNEX

Cupertino's EOP

EOP

The Emergency Operations Plan (EOP)

- *Provides the structure and processes that the City uses to respond to and initially recover from an event.*
- Cupertino's plan was submitted and approved in 2019.

Link: <https://www.cupertino.org/home/showpublisheddocument/24990/637019800695800000>

Volunteer Annex

EOP > Volunteer Annex

- Describes volunteer management related to outreach and education programs, guidance on volunteer integration, procedures to activate a Volunteer Coordination Team, call centers, relevant points of contact, safety and security considerations, and a demobilization process.

Link: https://www.cupertinoares.org/docs/210715-Cupertino_Volunteer_Annex_FINAL.pdf

Appendices

EOP > Cupertino Volunteer Annex > Appendices

A. Capabilities Descriptions

B. DSWVP form

C. Code of Conduct

D. Minors DSWVP usage guidelines

E. ID Badge, Photo both sides and printing instructions

F. (Future Use)

G. Sign-In Documents

H. Drivers' skills sign off sheet for 469 Vehicle

I. Training matrix Citizen Corps, DOC

J. Citizen Corps managed assets

K. Handbooks, ARK Activation, Field Responder, others

L. Fingerprinting

CCC Capabilities Descriptions

EOP > Cupertino Volunteer Annex > Appendices > Capabilities Descriptions

Auto Activation Capabilities

- 1.1 Citizen Corps Dept Op Center (DOC)
- 1.2 Emergency Radio Net
- 1.3 Mike-Mike Assessment Reporting
- 1.4 Neighborhood Safety Assessment
- 1.5 ARK Level 3 Activation / Zone Reporting
- 1.6 ARK Level 2 Activation / Field Comms
- 1.7 ARK Level 1 Activation / Full; ICP
- 1.8 Light Search and Rescue
- 1.9 Cribbing
- 1.10 Utilities Management
- 1.11 Fire Suppression
- 1.12 Neighborhood Damage Assessment
- 1.13 Infrastructure Safety Assessment (ISA)
- 1.14 EOC/ICP Communications Support
- 1.15 Alt911 Field Call Taking
- 1.16 Medical Treatment Area
- 1.17 Psychological First Aid
- 1.18 Good Samaritan Response

Requested Activation Capabilities

- 2.1 Communications Shadow
- 2.2 Public Safety Partner Mutual Aid
- 2.3 RACES Mutual Aid
- 2.4 Medical Treatment First Aid Booth (Public Service Events)
- 2.5 Psychological First Aid Site Support (Shelter)
- 2.6 Area Search and Canvassing
- 2.7 Specific Situation Monitoring
- 2.8 Public Service Field Response
- 2.9 Language Interpreting Services
- 2.10 Shelter Staffing
- 2.11 Points of Distribution Staffing

Link: https://www.cupertinoares.org/docs/210715-Cupertino_Vol_Capabilities_FINAL.pdf

CARES Task List

.... > Capabilities Descriptions > cupertinoares.org > Docs & References > [CARES Task List](#)

CARES Level 3 Tasks

1. Event Management
2. Resource Management
3. Resource Net Control Operations
4. Message Net Control Operations
5. Field Message Handling
6. Packet Message Handling
7. ~~Preliminary Safety Assessment~~ Mike-Mike Reporting
8. Infrastructure Safety Assessment
9. Alternate 9-1-1 Operations
10. Ember Watch Operations
11. Cross-band Operations
12. Fire Station Operations
13. ARK Activation
14. Comm 469 Operations
15. Alternate (Equipment) Response Plan Operations
16. County MAC Notifications

#6

COVID-19: WHAT'S NEXT?

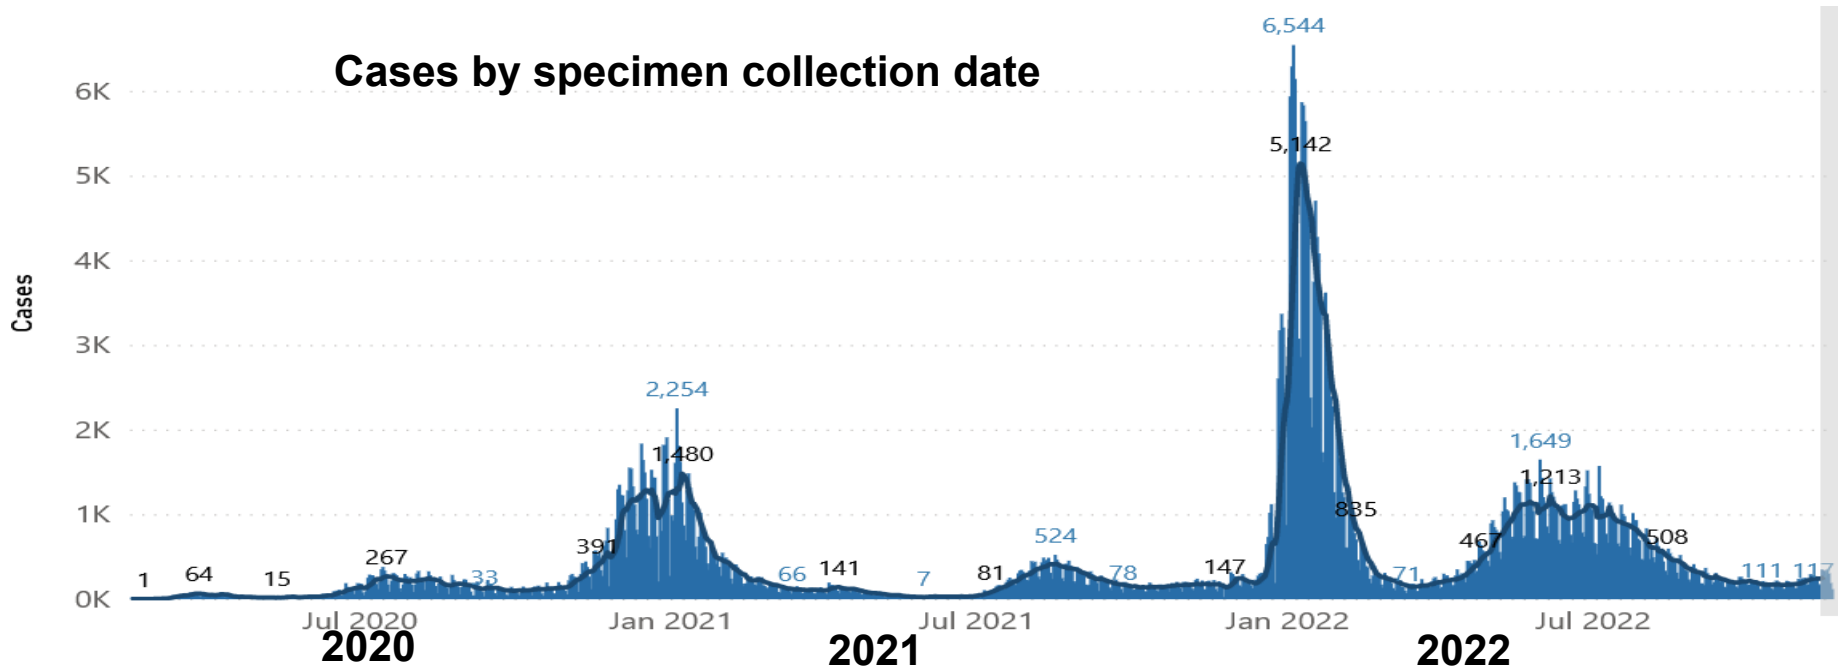

Tracking Covid, then...

Cupertino ARES/RACES

Tracking Covid... and now

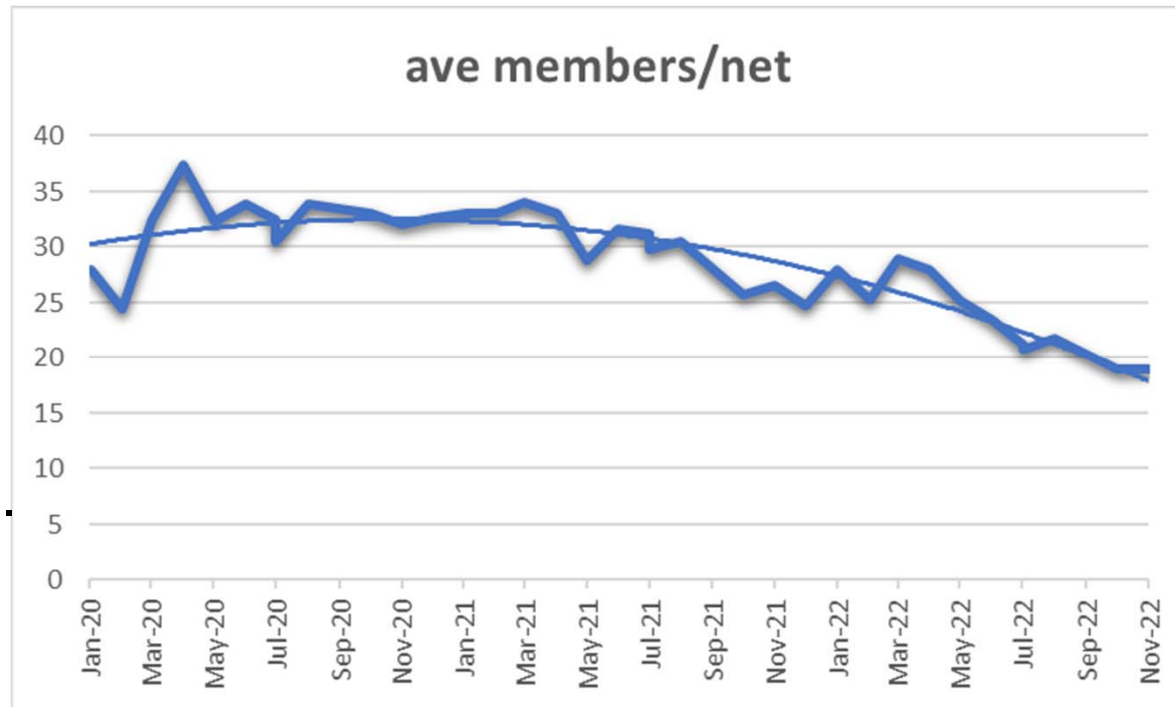

Concentration of SARS-COV-2 in Wastewater Samples

Covid and a CARES Retrospective

- March 2020: *“I’m sheltering at home... now what?!”*
- Net weekly check-ins jumped up by 15-30% some weeks during the first year.
- We moved our F2F meetings to Zoom.
- Introduced early check-ins.
- Moved the net back to 7:40pm.
- April 2021: Counts started to drift down, possibly as vaccines became more available and employers ‘invite’ employees back to the office.
- Fall 2022: getting back to pre-Pandemic levels

And Today...

1. You're feeling cruddy. Is it flu? COVID?

A: Yes, you might have COVID.

Yet again, this time it might be the flu.

Or maybe its just a really bad cold that is making the rounds.

2. What do we do in 2023?

a. Reset our Net start time to 19:45... lets start that on Tuesday 6-Dec

b. Go back to Face-to-Face meetings? Stay with zoom?

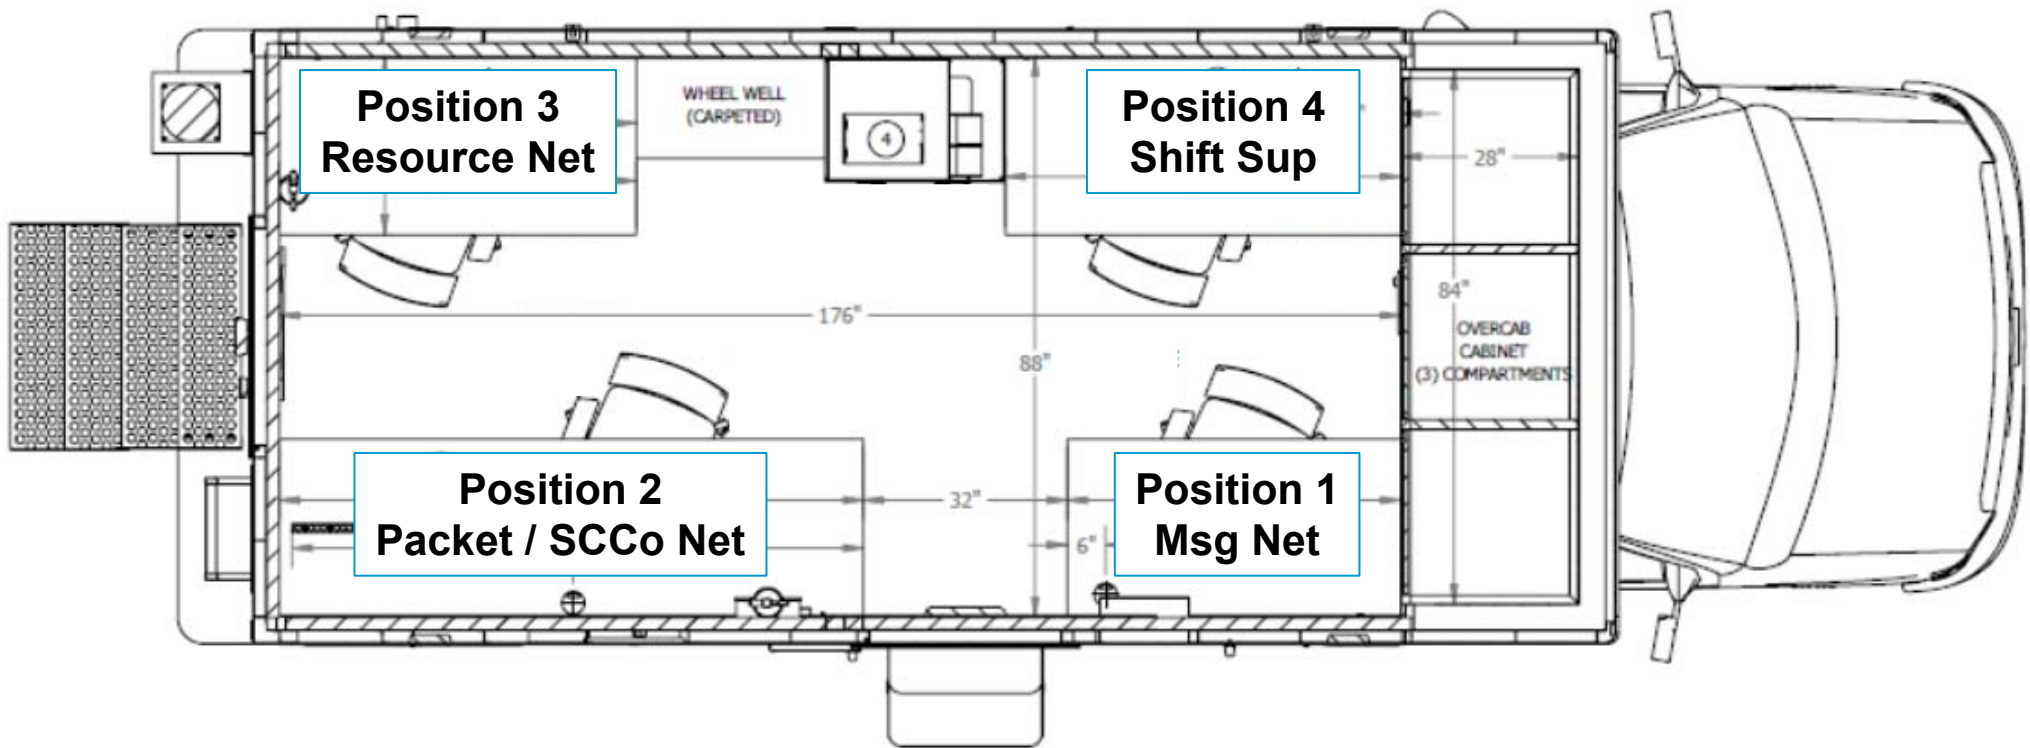

#5

OUTDOOR PACKET

C469 Layout – As built

Comm 469 Packet Radio

How Packet was set up in Comm 469

1. Radio connects direct to the Mast Antenna
2. TNC connects direct to the radio
3. Packet PC connects direct to the TNC

Comm 469 Packet Radio

What's changed?

1. Antennas reconfigured to support GMRS
2. Move to a single net on W6TDM for most of our operations
3. Upgrade the Packet PC to a laptop
4. Started to loosen COVID-19 restrictions
5. Occasional need for a scribe with net control
6. Acknowledgement that it does get crowded in the truck

How to address crowding

1. Move packet operations outside of Comm 469
2. Move GMRS monitoring outside of Comm 469

Comm 469 Packet Radio

And Now...

1. Radio connects direct to the Mast Antenna
2. TNC connects direct to the radio
3. Local Linux Server connects to the TNC
4. Linux Server connects to the C469 LAN / Router
5. Packet PC connects to the TNC over C469 LAN

Comm 469 Packet Radio

Implementation:

1. Laptop can be taken outside Comm 469 for packet operations
2. Needs to be within range of the Comm 469 Wi-Fi signal
3. Reduces crowding in the truck
4. Other than one extra Laptop startup task, the packet software works the same.

And the software?

- ***ser2net***: A Linux software package that provides a way for a user to connect from a network connection to a serial port.
- ***COM2TCP***: Windows programs that creates a virtual PC com port that is mapped to a remote device over a network connection.

2022 FIRE SEASON

Earlier this year...

Apr 3, 2022 – Ongoing drought, extreme weather. Sacramento Bee

- California's recent fire seasons have stretched unsettlingly late into the year, with devastating blazes breaking out in November and December.
- Climate change and forest conditions mean 2022 could be bad for wildfires in California... *UC Berkley Climatologist*

California wildfire risk factors

DROUGHT

The drier it is, the better it burns.

WIND

Winds fan flames & carry sparks.

HUMAN ACTIVITY

Negligence can lead to wildfires.

And now?

Nov 7, 2022 – Is California’s Fire Season Over?

New York Times

- “... But this year, thankfully, the fire forecast looks much less grim.
- “Recent rainfall and cold weather have already quashed fire season in Northern California”
- In the short term, this is really one of the best forecasts you could hope for if you don’t like drought and extreme autumn wildfires.
- “The upcoming rain and mountain snowfall should deliver some much needed water to parched ecosystems, and effectively kill off fire season in northern and central California once and for all.”

... Daniel Swain, UCLA climate scientist

And from the State?

<https://www.gov.ca.gov/2022/11/17/governor-newsom-and-cal-fire-announce-the-end-of-peak-wildfire-season-for-most-of-california/>

Governor Newsom and CAL FIRE Announce the End of Peak Wildfire Season for Most of California

Published: Nov 17, 2022

CAL FIRE completed more than 20,000 acres of prevention and mitigation projects in the last two months

Under the Newsom Administration, California has invested record amounts in wildfire response and resilience projects

[B-ROLL](#): CAL FIRE 2022 controlled burns and brush cleanup

NAPA – Today, at a fire station in Napa, Governor Gavin Newsom and state fire officials announced the end of peak fire season in most areas of California, while highlighting CAL FIRE’s early work in preparation for next year’s wildfire season. The state stays ready to respond to wildfires across the state. Just yesterday, Los Angeles and Ventura Counties were under Red Flag Warnings, underscoring how California wildfire season is year-round.

And, the disclaimer!

- Of course, there are no guarantees when it comes to California's increasingly year-round fire season.

Here's hoping for a light 2023 Fire Season!

#3

PG&E PSPS VS EPSS

What is PSPS?

PSPS – Public Safety Power Shutoff

Power is turned off proactively to help prevent wildfires as a last resort during severe weather.

- **Notification:** We are notified in advance with real-time updates
- **When:** Outages are likely during high winds, low humidity, and dry vegetation; most likely from September to November.

PSPS... Year over year comparison*

Event Details	2019	2020	2021
PSPS Events	7	6	5
Customers Impacted	2,014,000	653,000	80,400
Average Number of Counties Impacted	17	17	10
Average Outage Duration (hours)	43	35	31
Average Outage Restoration Time (hours)	17	10	12
Damage/Hazards	722	257	442
Peak Wind Gusts	102 MPH	89 MPH	102 MPH
Potential Impacted Acreage Prevented	3.5M	912K	691K
Potential Damaged Structures Prevented	280K	196K	86K

*CPUC Public Briefing, August 2022

What is EPSS?

EPSS – Enhanced Power Safety Settings

EPSS technology turns off power within 1/10 of a second if a hazard, like a tree branch, strikes a line to prevent wildfires before they start.

- **Notification:** If there is an outage, PG&E will share updates on when power will be restored. Since power goes out from an unplanned safety threat, unable to send notifications.
- **When:** Began implementing EPSS in July 2021.
- **Does it work?** In 2021, PG&E saw *80% reduction* in ignitions on EPSS-enabled lines over previous years.

How does EPSS work?

1 When an **object** strikes the line or a fault occurs...

2 ...protective devices shut off power within one-tenth of a second.

3 We check the lines for damage before safely restoring power.
Patrols are done by helicopter, truck or on foot during daylight hours.

POWER OFF

PG&E

PG&E's EPSS Testing

EPSS Settings DISABLED

EPSS Settings ENABLED

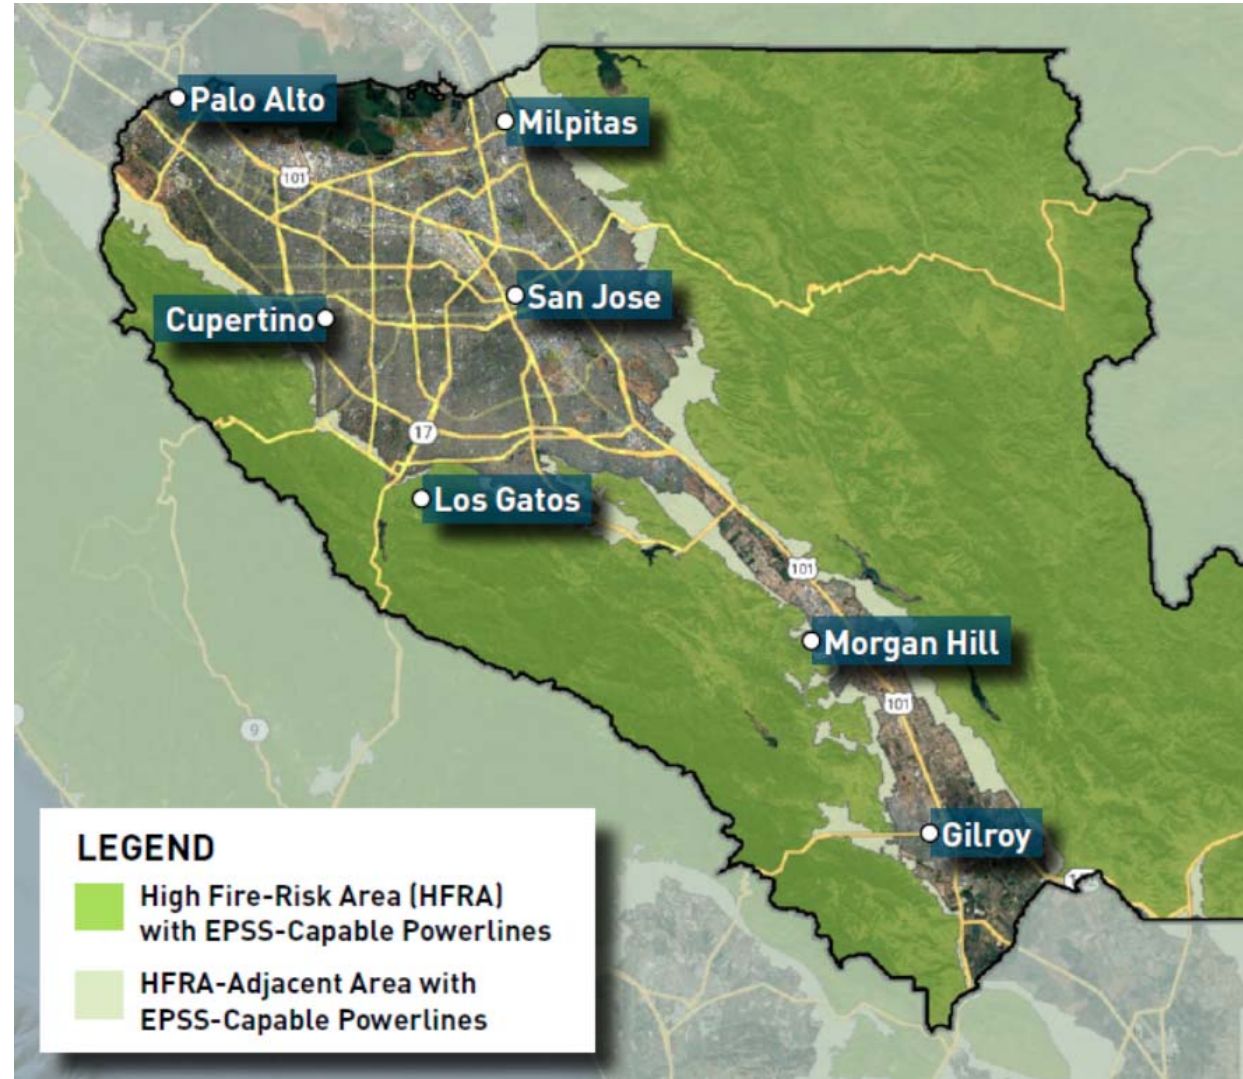

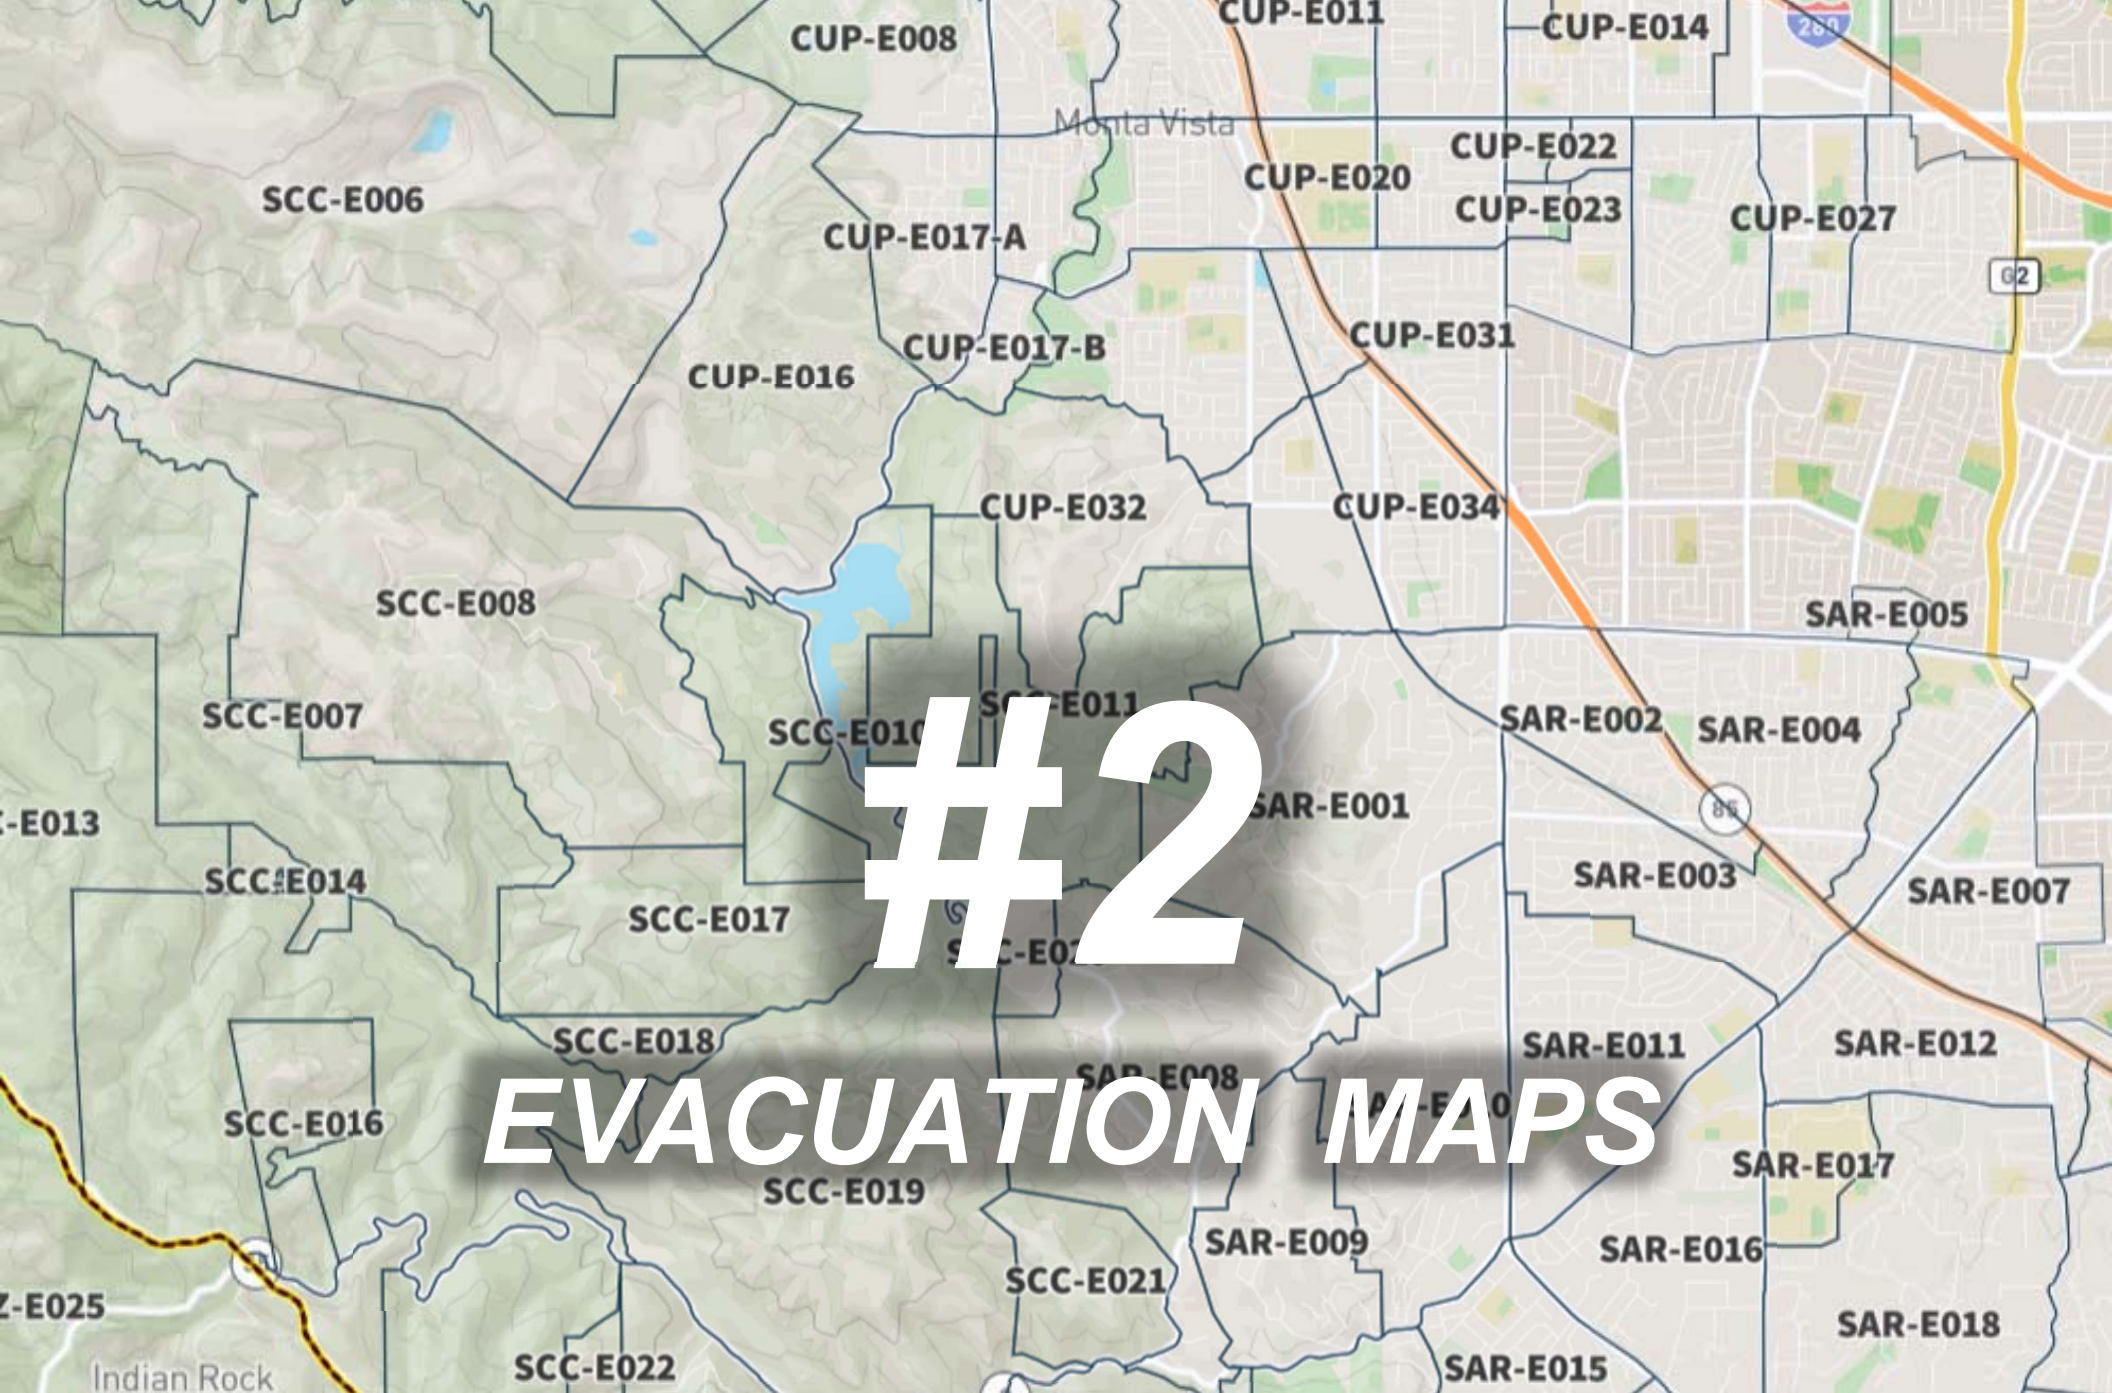

Where is EPSS in the Bay Area?

Why we care in Cupertino

Santa Clara County

Approximate areas in the community powered by EPSS-capable circuits, which will be enabled during times of heightened wildfire risk.

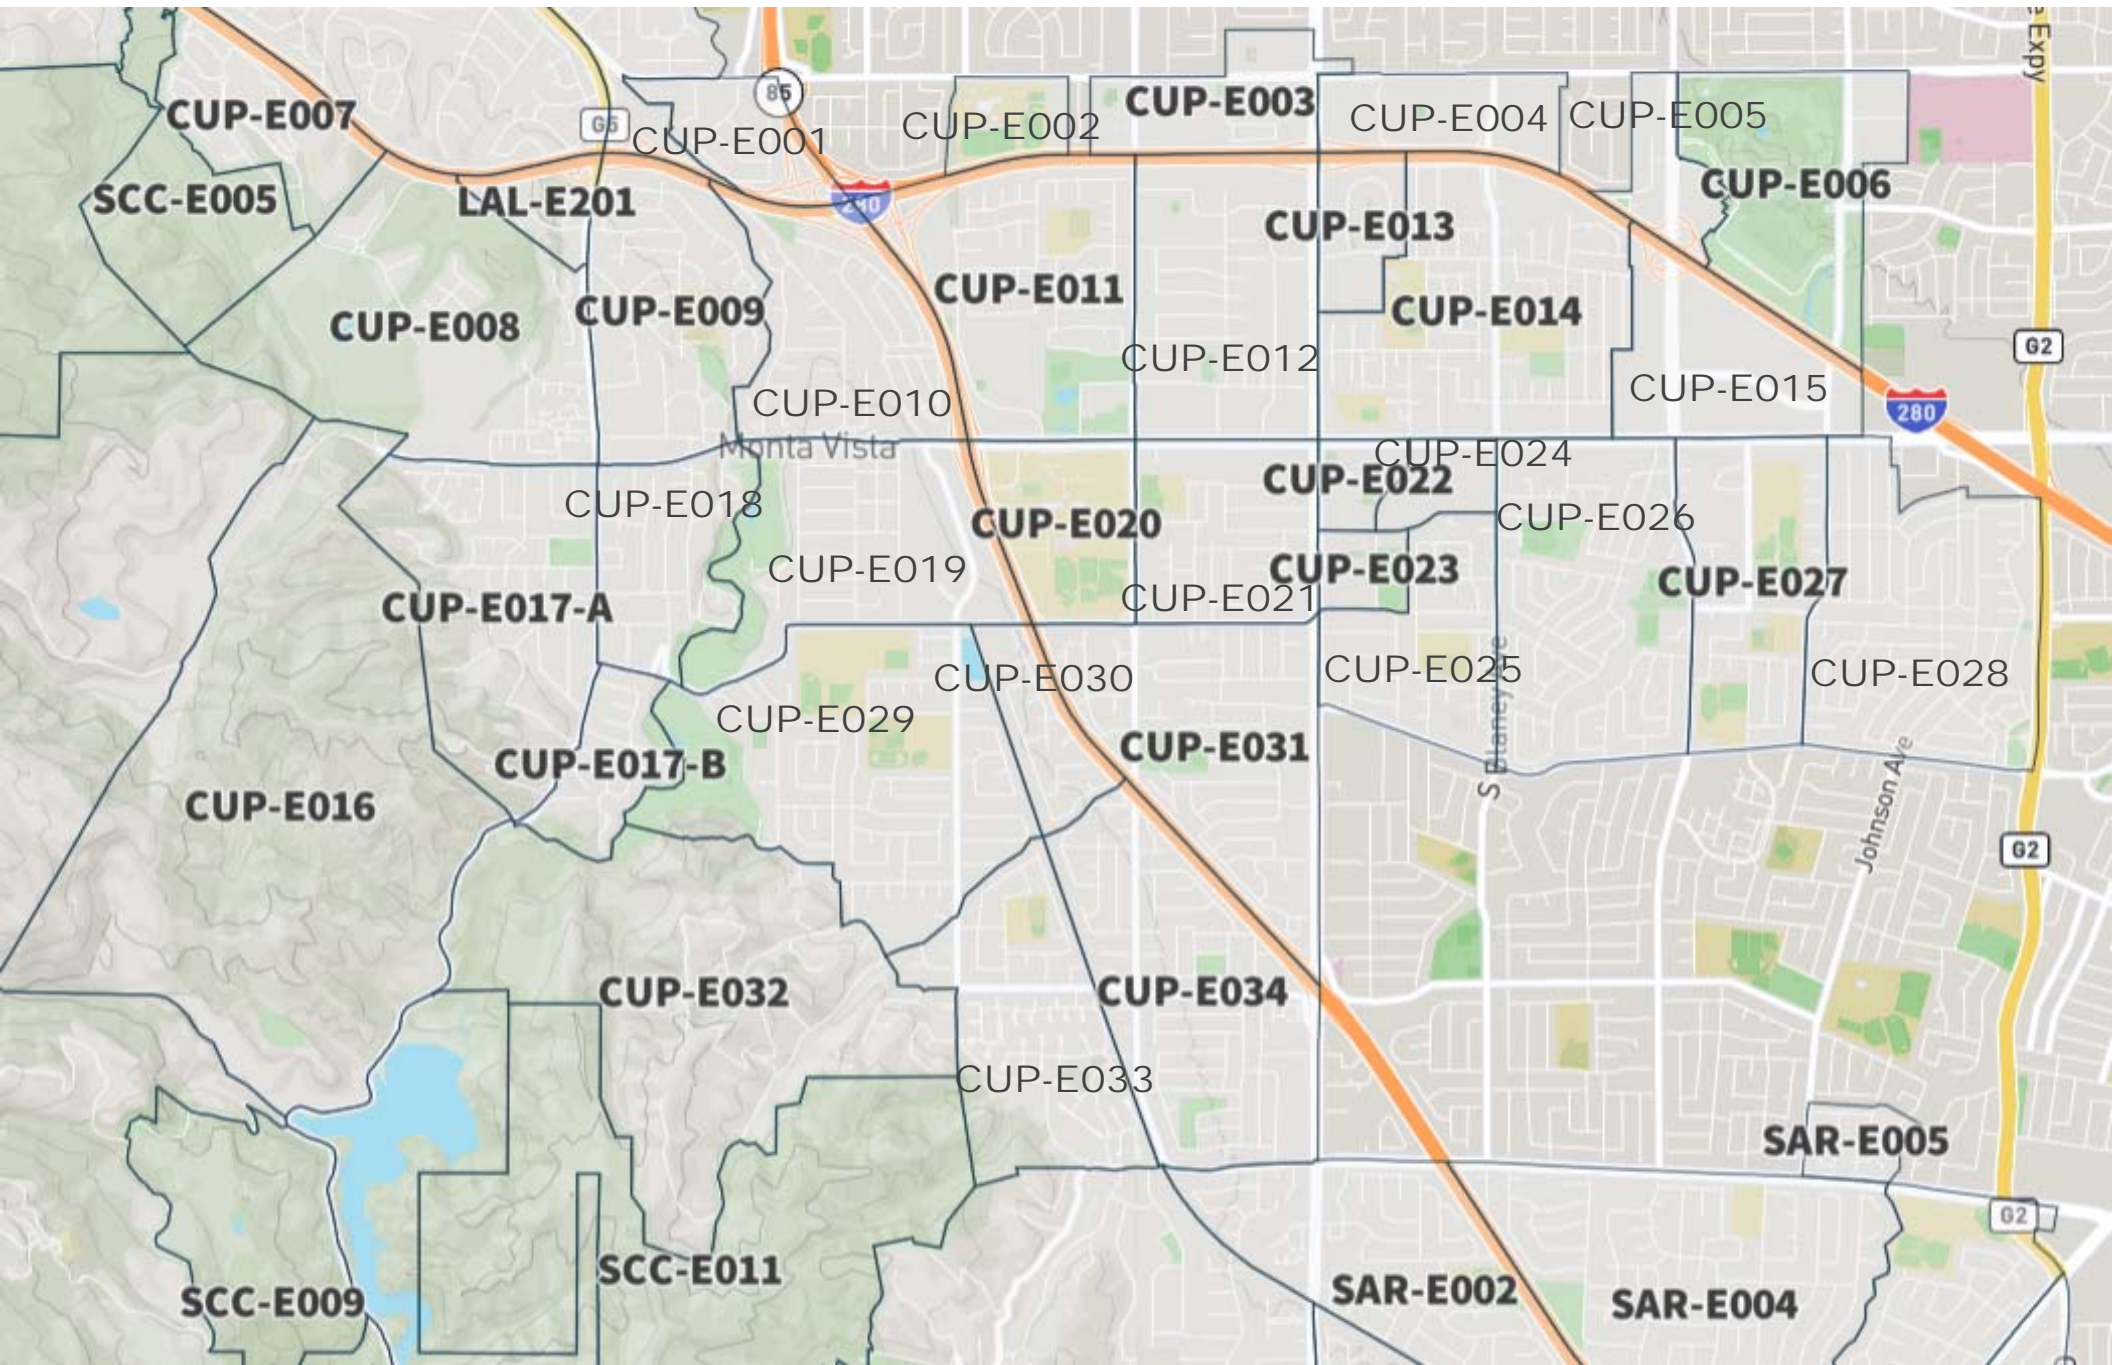

#2

EVACUATION MAPS

What's new?

- County Fire defined 34 Cupertino zones that follow natural or man-made boundaries
- City's goal is on coordination with public safety partners, learning from past fires (2017 - 2021), increase resident engagement and comply with recent state legislation (AB747 requires an evacuation planning element).
- In 2022,
 - City OEM ran 2 table top exercises with public safety partners.
 - City built and rolled out evacuation tools
 - CCC ran the west side evacuation exercise which prompted questions on CARES' and CERT's role during an actual wildland fire threat.
- In short... coordination and communication lends itself to a better situation when something does happen.

- Click on Downloadable Zone Maps and pick your zone or
- Use the map to zoom in, find your area, and open the map

CARES' role during an evacuation

During a wildfire threat,

- What we can do...
 - C469 is deployed to the EOC or ICP to manage CCC radio traffic, backup communications with other jurisdictions.
 - ARK(s) are opened in the impacted zone areas to roll up neighborhood reports (CERT) for the EOC (CARES) and passes back information from the city.
 - CARES deploys field teams to specific locations to monitor and make observation reports (specifics?).
 - CARES deploys Communications Shadows to cover specific individuals with backup communications.
 - CERT/CARES deploys to open shelters to assist the Shelter Manager; may apply to Temporary Evacuation Points as well.

CARES' role during an evacuation

During a wildfire threat,

- What we won't do...
 - Respond beyond our training
 - Deliberately put ourselves in harms way
 - Operate in an ***Evacuation Order*** Zone

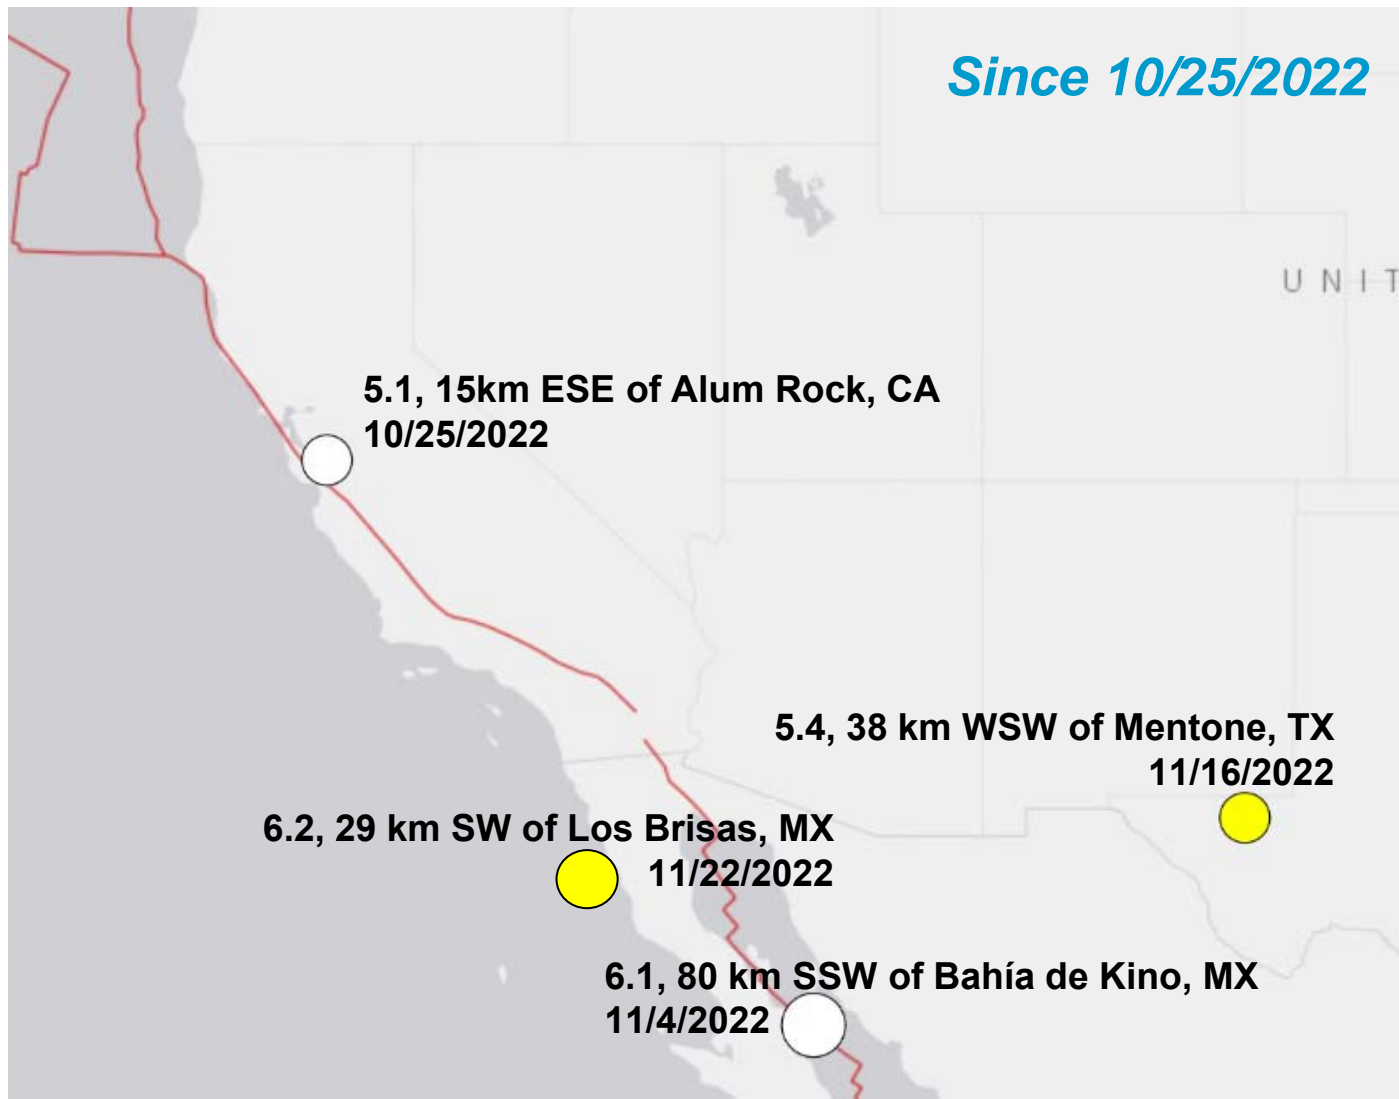

#1

***EARTHQUAKES...
THEY'RE BACK!***

USGS Magnitude 4.5+ Earthquakes, Past Month

4 of 504+ earthquakes in the map area

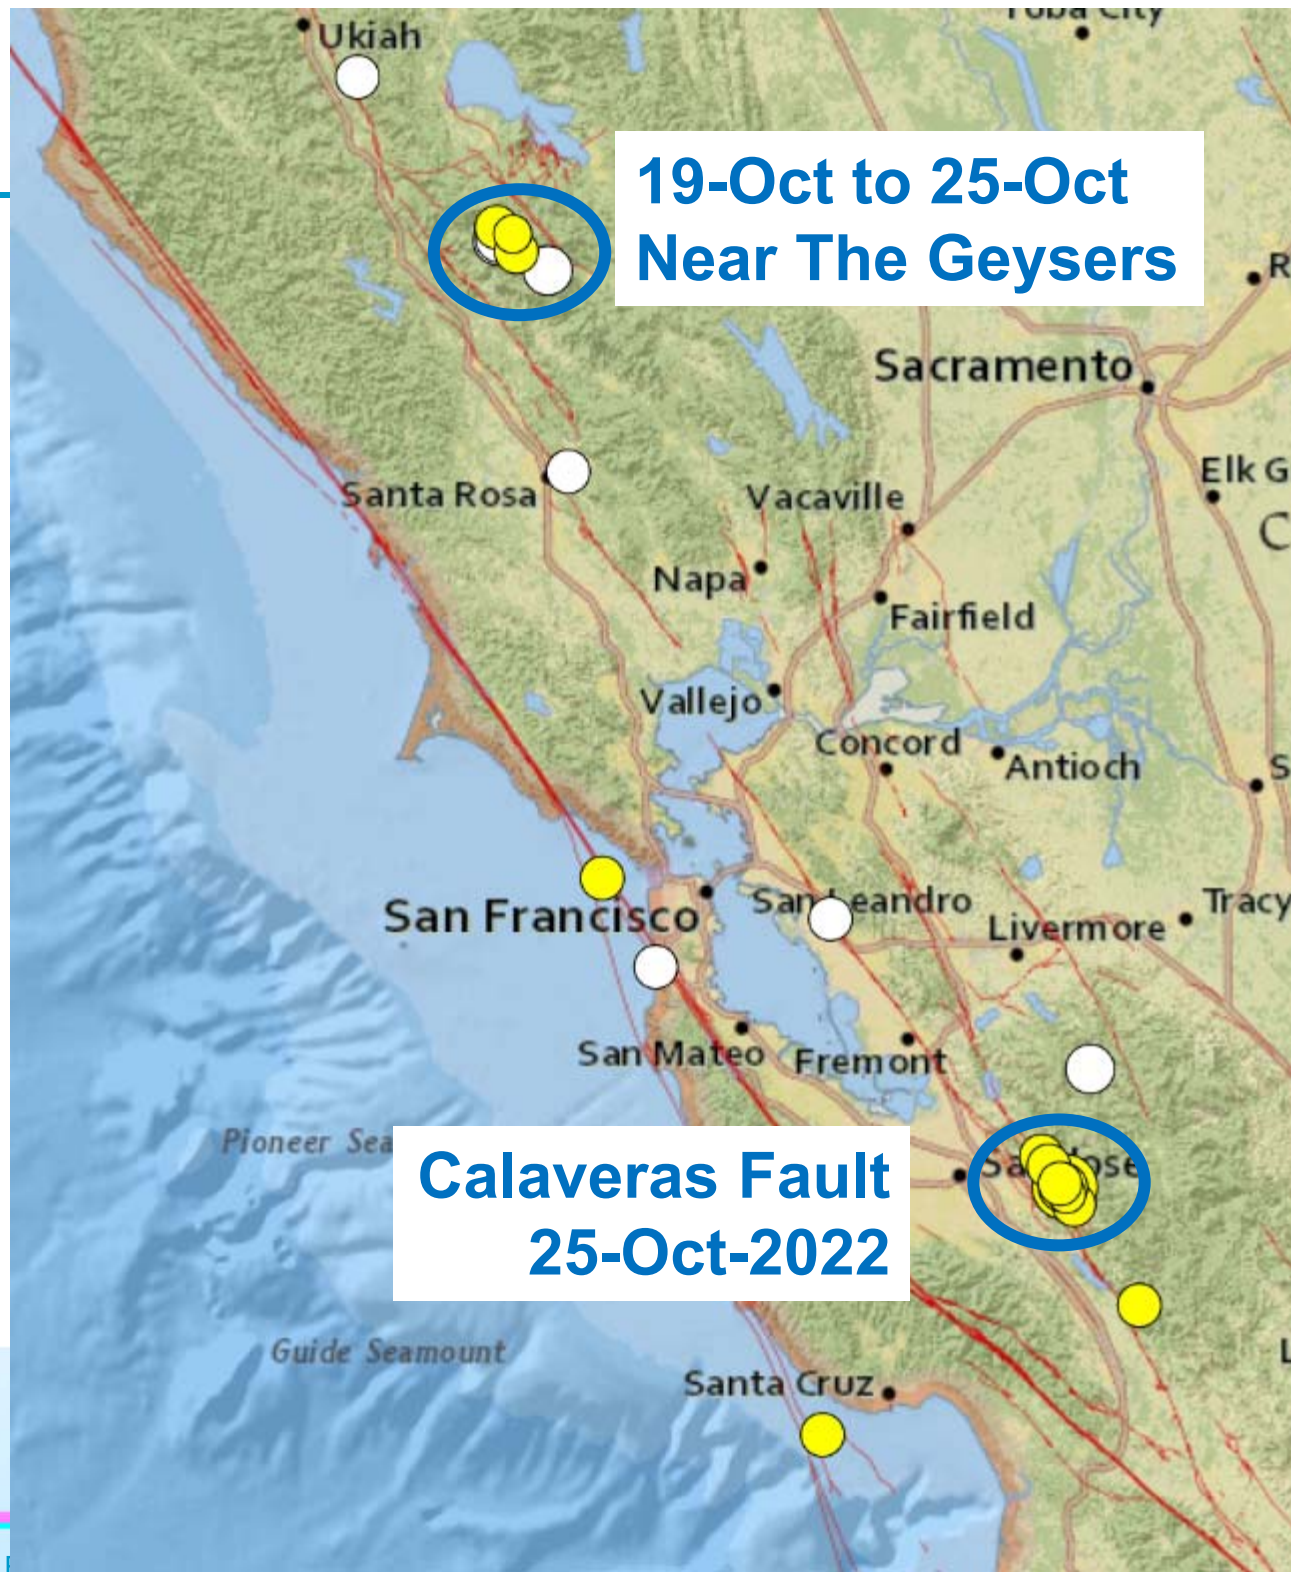

<https://earthquake.usgs.gov/earthquakes/map>

2.5+ magnitude 'quake clusters

- The San Andreas fault system forms the plate tectonic boundary between the North American Plate and the Pacific Plate.
- The Calaveras Fault, is part of the San Andreas Fault System
- This earthquake appears to have ruptured a patch at depth on the near-vertical Calaveras Fault.
- Historically, this section of the Calaveras fault has been very seismically active, producing earthquakes of magnitude 5 to 6.5 on the time scale of decades.

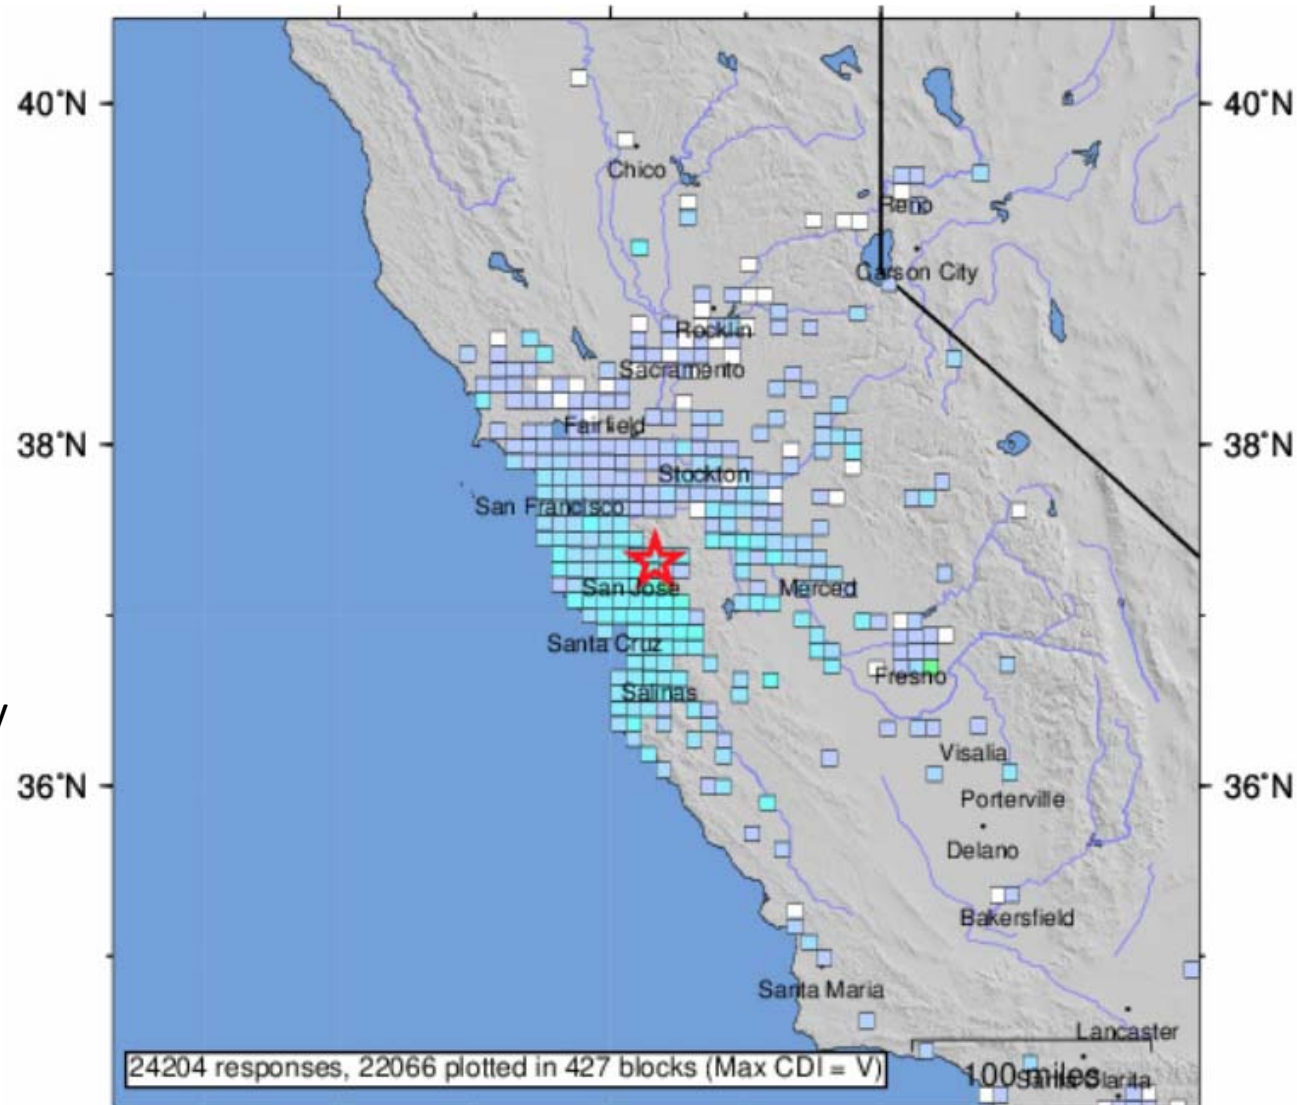

25-Oct-2022... Did you feel it?

<https://earthquake.usgs.gov/earthquakes/eventpage/nc73799091/dyfi/intensity>

Modified Mercalli Index

<u>Intensity</u>	<u>Shaking</u>	<u>Damage</u>
I	Not Felt	none
II, III	Weak	none
IV	Light	none
V	Moderate	Very Light
VI	Strong	Light
VII	Very Strong	Moderate
VIII	Severe	Mod/Heavy
IX	Violent	Heavy
X+	Extreme	Very Heavy

SHAKING	Not felt	Weak	Light	Moderate	Strong	Very strong	Severe	Violent	Extreme
DAMAGE	none	none	none	Very light	Light	Moderate	Moderate/Heavy	Heavy	Very Heavy
INTENSITY	I	II-III	IV	V	VI	VII	VIII	IX	X+

Why even mention this?

With all the recent focus on wildland fires, we cannot forget that we live in earthquake country!

Earthquake Country

We're all in this together.
